MediaRich Visualizer for Sharepoint from Equilibrium - Enterprise-Class Freeware!

For free, MediaRich Visualizer for SharePoint provides instant visual enhancements to any SharePoint deployment as well as high-volume media processing & distribution.

Visualizer brings higher levels of functionality and visual imaging capabilities to all SharePoint licensees.

- * Visualize all image, Office and video assets directly in SharePoint - over 300 file formats.
- * Preview all documents with high-speed zoom & pan - large image and video files as well as Microsoft Office documents of any size and type
- * Permits advanced searching on all media asset metadata throughout the enterprise
- * Make media assets broadly available to any user, at anytime - enterprise wide
- * Administer a single IT platform for all corporate media assets.

More at DataBasics <http://www.databasics.com.au/equilibrium/visualizer.html>

"What really surprised me was that MediaRich lets users preview and zoom into other file types too, most notably PDF and all of the Office file formats. Since MediaRich updates the standard Document Library with thumbnails that support high-quality zooming and panning, users can quickly determine if a document is the right one, without having to download and open the files in their original applications, a huge time savings. Nice."

- Ron Sielinski, Senior Product Manager, Microsoft Office Business Platform

Canto Cumulus 7.6.1 Update

And Canto Cumulus 8 on its way! As excitement builds for the next major release of Cumulus, Cumulus 8 due in May/June - and recently previewed by CEO Uli Knocke in a series of free Seminars around the country (<http://www.print21online.com/news-archive/australia-gets-sneak-peak-of-cumulus-version-8/>)

- the Canto team have been steadily improving the current release of Cumulus and providing more information on using Cumulus in the workplace.

New Features of Cumulus 7.6.1 include:

- Visio Support - Enhanced metadata support is now available for Microsoft Visio. When Visio files are cataloged, their entire text contents can be extracted and saved as searchable metadata by Cumulus.
- SCORM Support - Cumulus now supports Sharable Content Object Reference Models (SCORM). This support is provided by a special SCORM AssetStore and Filter. For more info about SCORM see <http://www.scorm.com.au>
- HELIOS AssetProcessor - the HELIOS AssetProcessor provides a new option that allows specifying additional layout parameters.
- and last but not least: InDesign CS4 Support - the Cumulus InDesign plug-in now supports InDesign CS4.

See the Release Notes for details of fixes and features:
