
Dynagram Ships DynaStrip 6 - Press Release September 2009

PRESS RELEASE - For Immediate Release

Dynagram ships DynaStrip 6.0

Quebec, September 3rd 2009 – Dynagram, the leader in innovative imposition technologies, announces the release of DynaStrip 6.0. This major upgrade focuses on features to make imposition creation and editing more productive.

***Complete Update of the Workstyles ***

The workstyles functionality has been completely reworked to offer more flexibility for work & turn jobs. On the light table, when adding a sheet with a Work & Turn or Work & Tumble attribute, a symmetry axis line will be drawn in the middle of the surface to split it in two halves, simulating the front and the back.

***The Layout Reflow feature ***

The all-new Layout Re-flow feature is designed to make changes to multi-sheet layouts as simple as a single click. With this new feature, users can modify layout attributes, page and sheet marks on the first signature or modify the document list then by clicking the "Re-Flow" button the entire job is re-flowed based on all the new changes. No need to manually add/remove signatures or make new templates for minor global changes. To view a short movie on the new Layout Reflow Feature, visit http://www.dynagram.com/movies/?m=Dynagram-DynaStrip-Use_Reflow_Layout

Other Enhancements

In addition to the powerful new workstyles and Re-Flow feature, DynaStrip 6.0 will also offer a variety of other enhancements and updates throughout the software to increase productivity and flexibility. This includes totally customisable side-guides, enhanced output options to compensate for web growth, and new control options for many marks. For the complete list of enhancements, refer to the release note PDF at http://www.dynagram.com/x_fichiers/SupportDOC/DynaStrip/EN/ReleaseNotes.pdf

UPGRADE INFORMATION Customers owning a valid Service Agreement or International Upgrade Agreement are entitled to this upgrade for free. Customers at version 5.x: to purchase an upgrade, contact DataBasics.

Customers at version 4.x: /Extended Upgrade Deadline/

With the release of DynaStrip 6.0, DynaStrip 4.X customers are no longer eligible for upgrades. However, Dynagram has extended the deadline for 4.X customers to upgrade to September 30, 2009 to allow every customer the opportunity to upgrade. Customers with questions about their eligibility should contact DataBasics - support@databasics.com.au
