Dynagram announces DynaStrip Network - Press release October 2006

Dynagram announces DynaStrip Network, the latest edition to its acclaimed DynaStrip imposition solution suite

Quebec - October 13, 2006 - Dynagram, the provider of the widest range of imposition solutions, announced today a new addition to its renowned line of robust imposition solution, DynaStrip. DynaStrip Network is a **floating license edition**, allowing customers to share DynaStrip on multiple client workstations.

This addition is a response to a considerable demand from customers worldwide. From now on, by purchasing DynaStrip Network, printers will be able to use the sophisticated application on multiple workstations.

DynaStrip Network is a dongle-protected application that uses only one multiplatform dongle. A single HASP key, connected to any computer on your network, can provide up to 10 concurrent DynaStrip users depending on the package purchased. Being cross-platform the dongle can be connected to any PC or Macintosh computer on the local area network. The HASP HL Net hardware keys work only on MacOS X.

This brand new edition will be delivered by the end of October 2006. For more information on DynaStrip Network, contact DataBasics at info@databasics.com.au
