HELIOS third party products

Datentechnik - imageConvert and WSLogReport

imageConvert adds to the functionality of HELIOS ImageServer to provide a server based hot drop folder where files can be placed and automatically converted to nominated format, resolution, colour space, etc.

The user interface of imageConvert is truly intuitive - simply create a folder with a name defining the final output of the conversion... how simple is that!

DTIC	imageConvert	\$1,500	\$1,650
------	--------------	---------	---------

WSLogReport creates a report of the HELIOS WebShare accounting files. This report contains a monthly summary per user and additionally a collection of each single action of the users. The reports are reworked daily.

DTWS	WSLogReport	\$950	\$1,045
------	-------------	-------	---------

macademy - OPI Manager and FlowView

OPI Manager is a plug-in for Adobe InDesign which offers a complete OPI workflow with HELIOS ImageServer. When printing from InDesign, OPI Manager recognises which layout images are affected by the flattening process and automatically replaces them

...continued over page

with the corresponding high-resolution original images during printing.

Please see the macademy price list for OPI Manager and FlowView - online at http://www.databasics.com.au/docs/macademy_auprice.pdf

HELIOS Product Notes:

Base licenses 10 users - UB+ Upgrades and SE002 from all previous versions 10 user base license, use 5 user products for subsequent upgrades and SE002 coverage.

Educational sites purchasing ES020/PS020/WS020 product receive a 100 user license.

HELIOS Internet Update Access (SE001)

The HELIOS Internet Update Access SE001 is available for the EtherShare, WebShare, ImageServer, PDF Handshake, Print Preview and PCShare products. SE001 is tied to the customer's specific HELIOS product serial number.

SE001 grants customers the right to get and to use HELIOS updates for their specific product over the next 12 months; it also gives customers access to the update download area on the HELIOS web server <http://www.helios.de/>. There are no physical goods delivered to a customer who has purchased HELIOS Internet Update Access. Pricing for SE001 on application.

HELIOS Update Service Agreement (SE002)

The HELIOS Update Service Agreement SE002 is available for the EtherShare, ImageServer, PDF Handshake, Print Preview, WebShare and PCShare products. SE002 is tied to the customer's specific HELIOS product serial number.

The HELIOS Update Service Agreement offers a cost effective method for HELIOS customers to benefit from the release of later software versions or major upgrades and updates. The agreement entitles the subscriber to the same benefits of an Internet Update Access Agreement (SE001) with the added benefit of major software upgrades free of additional charge for the period of twelve months from the date of subscription.

An Update Service Agreement (SE002) can only be purchased in conjunction with a new HELIOS license or with the purchase of a major upgrade to an existing license.

HELIOS Software Update Service Agreement with Cold Spare (SE003)

SE003 is a superset of the HELIOS product SE002 and includes additional secondary installation for the base licenses and all user expansions as specified in the licensing agreement.

SE003 can only be purchased in conjunction with a new HELIOS license or with the purchase of a major upgrade to an existing license. Existing standard software update service agreements can be upgraded to ones with Cold Spare any time for the remaining period. The upgrade does not change the duration of the existing agreement.

FB101 HELIOS Remote Proofing Solution Bundle - available till July 1st 2010

This bundle targets completely new customers or existing EtherShare/PCShare file server customers.

It includes the following products:

WS020 WebShare UB+ server base license 20 user

OP010 ImageServer UB+

...continued over page

OP020 PDF HandShake UB+
