

WebShare UB+

Highest-Performance Server for Real Time Remote File Access

HELIOS WebShare UB+ enables fast and secure real time remote file access via any web browser. Now authorized users can easily use your file server wherever they are, without exposing the server to the Internet. Working with files remotely has never been easier.

Easy Remote File Access by customers, suppliers, business partners or employees will eliminate the need to make files available via e-mail, burning CDs, or FTP, which often cause compatibility problems and waste resources. Automatic e-mail notification allows monitoring when files are being accessed. The easy to use web interface means no user training is required.

High Security is provided by a two-tier server application. The WebShare web server handles the web user interface on a separate server to ensure that the main file server is not available on the Internet. The server file system security is enforced according to the user credentials. Sharepoint based security allows further restrictions per user, e.g.: browse, preview, download, upload and file management.

Smart Ideas for Better Networking.

Remote Collaboration becomes a reality with the fully automated two-way access to the server data. File browsing and management allow authorized users to manage files and folders remotely, similar to the local Windows Explorer or Mac Finder. Optional HELIOS Image-Server and PDF HandShake provide remote document previews, and offer Internet clients a live content verification/proof of PDF, QuarkXPress, and InDesign documents as well as of all major image formats. Remote OPI allows web clients to download OPI low-resolution images from the server and to upload completed documents for later printing with high-resolution images.

Authentication via LDAP, AD/PDC, NIS and local server users is fully supported by the authentication server included in HELIOS Base.

Fastest Performance HELIOS WebShare is highly optimized for secure remote file access and provides several times faster download and browsing performance compared with FTP, WebDAV, AFP, and SMB/CIFS volumes mounted via the Internet.

Features & Benefits

Ease of Use

- Easy to install, administer, use
- All major web clients supported

Server Features

- Two-tier server application
- Sharepoints with custom permissions
- Server optimized "Find File"
- RSA crypted login & HTTPS support
- Brandings, personalized GUI per user
- Custom "Action Scripts" & Forms

Remote File Access

- Browse files and directories
- Download and upload files/folders
- On-the-fly Mac/Win ZIP compression
- File management: permissions, copy, rename, delete files and folders

Remote File Preview (Optional)

- QuarkXPress Mac/Win documents
- Adobe InDesign Mac/Win documents
- Acrobat PDF documents
- TIFF, EPSF, DCS-1 & 2, BMP, PICT, JPEG, JPEG 2000 and PNG images
- ICC color proofing

Flexibility

- All major server platforms

System Requirements

WebShare File Server

- One of the following server systems:
Apple Mac OS X, Linux, Sun Solaris, IBM AIX, Windows
Details: www.helios.de/platforms
- 32 MB RAM; 10 MB per active client
- Licensed per WebShare file server

Product Highlights

Server Installation

- Fast, menu-driven installation, easy installation for system administrators
- Web based administration

Client Installation

- Uses standard HTML web browsers, Java, JavaScript and Frames are not required

WebShare File Server

- Native program running on file server
- Supports Windows NTFS and UNIX Unicode/UTF-8 file systems
- File system security is enforced according to the user permissions, due to separate processes running with user credentials
- User authentication for local host users, LDAP, NIS, and Windows AD/PDC users via included authentication server in HELIOS Base.
- Virtual users/names are supported
- E-mail notification on activity
- TCP/IP security options, access lists
- Custom scripts with HTML forms
- E-Mail memo support included
- Priority/privileged user file transfer
- Server optimized "Find File"
- Detailed accounting audit trail
- Shared file comments (Web/Mac/PC)

WebShare Web Server

- Java program running on server with Internet connection
- Customizable user interface via built-in GUI-based branding editor

WebShare Web Server

- Java 1.4.x or newer runtime
- Any HELIOS supported server system
- WebShare web server will handle multiple WebShare file servers

Clients

- Windows, Mac, UNIX, iPhone clients using Safari, IE 6/7, Firefox

- Multiple language support
- WebShare web server uses one dedicated TCP/IP port for all web clients. (Optional firewall possible)
- No external CGI-programs used
- No data files are stored or cached on WebShare web server
- URL-based login parameters
- SSL content encryption is supported
- RSA 1024-bit encrypted passwords
- Utilizes Apple WebObjects technology
- Security white paper: www.helios.de/products/WS/security.phtml

WebShare File Server Tools

- "zipstream" generates on-the-fly ZIP files compatible with Mac and Windows file formats
- WebShare Perl scripts
Allow customization and auditing of web user actions, e.g.: login, download, upload, rename, duplicate, delete and copy files and folders
- Icon Collector tools for Mac/Win

WebShare Sharepoints

- Specify shared directories
- Users and groups are assigned to sharepoints
- Specify available options: browse, preview, download, upload, and file management (delete, copy, rename, move, create folders, etc.)
- Performance white paper: www.helios.de/products/WS/speed.phtml

Remote zoomable previews

Additional features provided by HELIOS ImageServer UB+:

- Previews of TIFF, EPSF, DCS-1, DCS-2, Scitex-CT, JPEG, PICT, BMP JPEG2000, JBIG2 and PNG images
 - QuarkXPress document previews for Mac and Windows documents
 - Adobe InDesign document previews for Mac and Windows documents
 - PDF document previews (via HELIOS PDF HandShake option)
- The remote document previews do not require access to the original documents, applications, images, fonts, etc.
- ICC color proofs of images and PDFs
 - URL based image access and API

HELIOS Base benefits

The WebShare File Server and the WebShare Web Server use HELIOS Base, which provides these core HELIOS technologies: Server fail safety, Unicode support, networking, and more.

Flexible Licensing Scheme

The WebShare File Server license is tied to a file server machine and a certain number of users. There is a 5 or 20 user server base license available. Expansions are available in steps of addl. 10, 100 or unlimited users. Optional maintenance agreements: Software Upgrade Service, cold spare licenses.
